EDUCATION

- 2013 - 2022
MAARDU GYMNASIUM
 - Basic Education
- 2022 - 2026
TALLINN POLYTECHNIC SCHOOL
 - Junior Software Developer
- 2026 - PRESENT
TALLINN UNIVERSITY OF TECHNOLOGY (TALTECH)
 - IT Systems Development (Bachelor's degree)

SKILLS

- HTML/CSS
- JavaScript
- NodeJS
- TypeScript
- Docker
- MySQL
- n8n
- DrawSQL
- Teamwork

LANGUAGES

- English (B2)
- Estonian (B2)
- Russian (C2)

PROFILE

Results-oriented Software Developer specializing in backend architecture, data extraction, and workflow automation. Proficient in Node.js, TypeScript, JavaScript and n8n. Proven track record of building robust web scrapers, developing complex automation workflows, and designing scalable RESTful APIs. Adept at handling inconsistent data structures, ensuring system stability, and delivering clean data in Agile environments.

WORK EXPERIENCE

- Software Developer (Intern)** Apr 2025 - Apr 2026
Ydalir Systems
 - Scraper Development:** Developed and managed a large-scale ecosystem of 3,000+ custom Node.js web scrapers (using Cheerio) to extract data from diverse media platforms with high accuracy.
 - Workflow Automation:** Architected and optimized complex automation subflows and generator logic in n8n, reducing manual data handling and significantly improving system scalability.
 - Maintenance & Debugging:** Ensured system stability by fixing broken selectors, handling inconsistent HTML structures, and optimizing data sanitization processes.
 - Data Quality:** Implemented rigorous testing and validation protocols to deliver clean, structured, and reliable data for production use.
 - Agile Collaboration:** Actively participated in team meetings and code reviews within an Agile framework, continuously improving task prioritization and team workflows.
- Database & Backend Developer (Academic Projects)** Sep 2024 - Jun 2025
Tallinn Polytechnic School
 - Database Architecture:** Designed and normalized scalable relational databases (MySQL) for various domains, including a comprehensive banking system, sports clubs, and educational institutions.
 - Advanced SQL Logic:** Implemented complex stored procedures for secure fund transfers and automated end-of-day balance calculations within the banking system.
 - System Auditing:** Set up automated audit logging using database triggers (AFTER INSERT, AFTER UPDATE, AFTER DELETE) to track account history and ensure strict data integrity.
